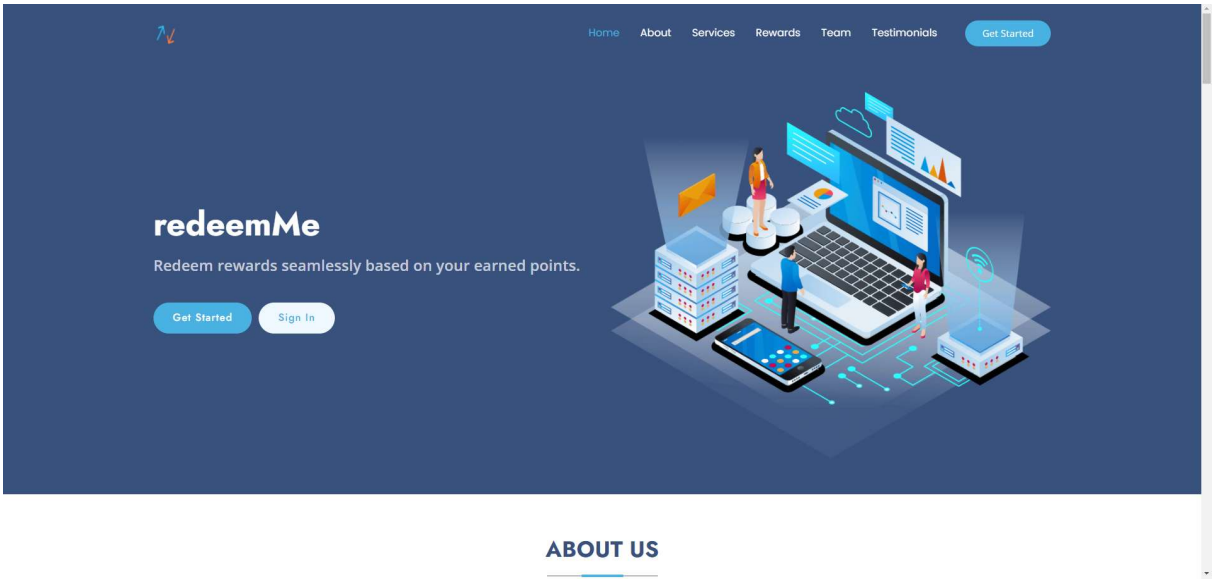
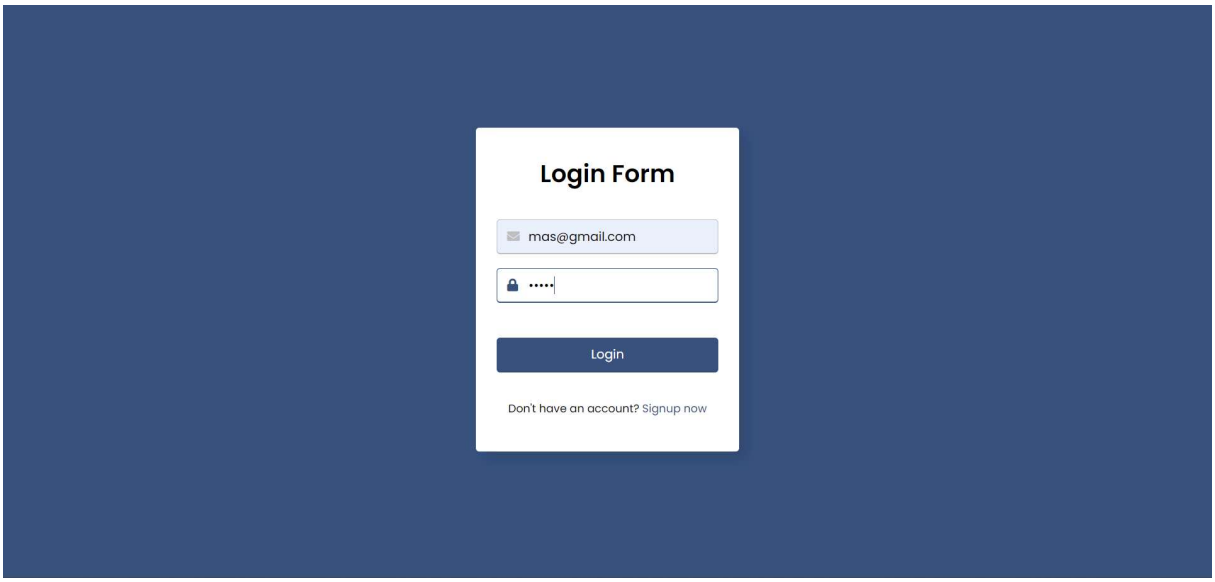
**USER MANUAL**
**RedeemMe**

## 1.0 Landing Page

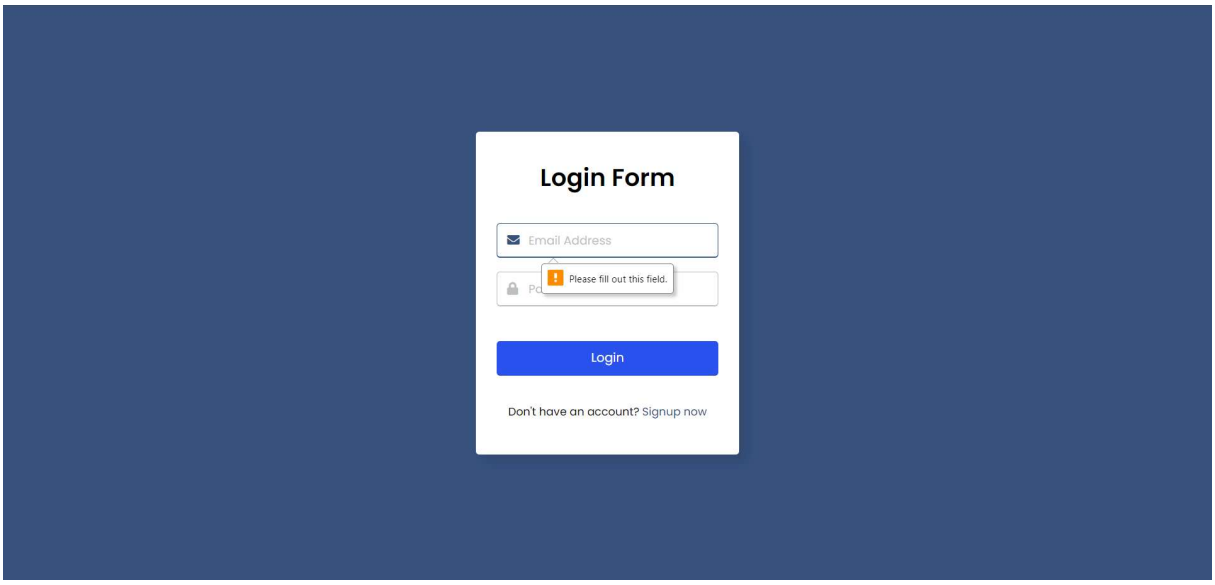


- When users open our website, they will be directed to the landing page. This landing page has six sections: Home, About, Services, Rewards, Team, and Testimonials. Users can navigate to each section by clicking the buttons on the navigation bar at the top of the page. If users want to log in to their account, they can click on the 'Sign In' button. Alternatively, they can click on 'Get Started' to sign up for a new account.

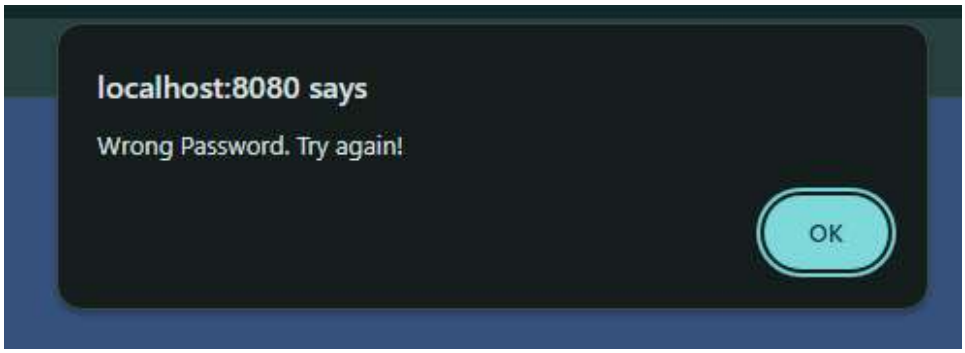
## 2.0 Login Page



- In the login page, users must enter their email address and password, then click the 'Login' button below the form to access their account. If users do not have an account, they can sign up for a new account by clicking on the 'Signup now' button at the bottom of the form.

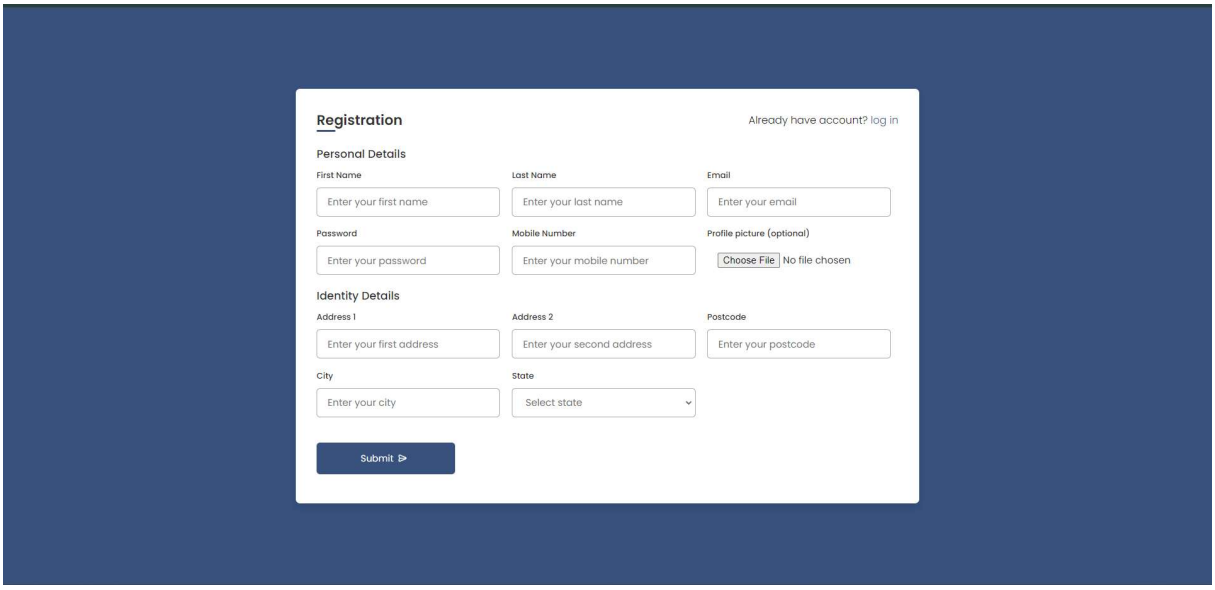


- If the user fails to fill in the required information an error message “Please fill out this field” will appear in the red color indicating the user to fill up the missing field.

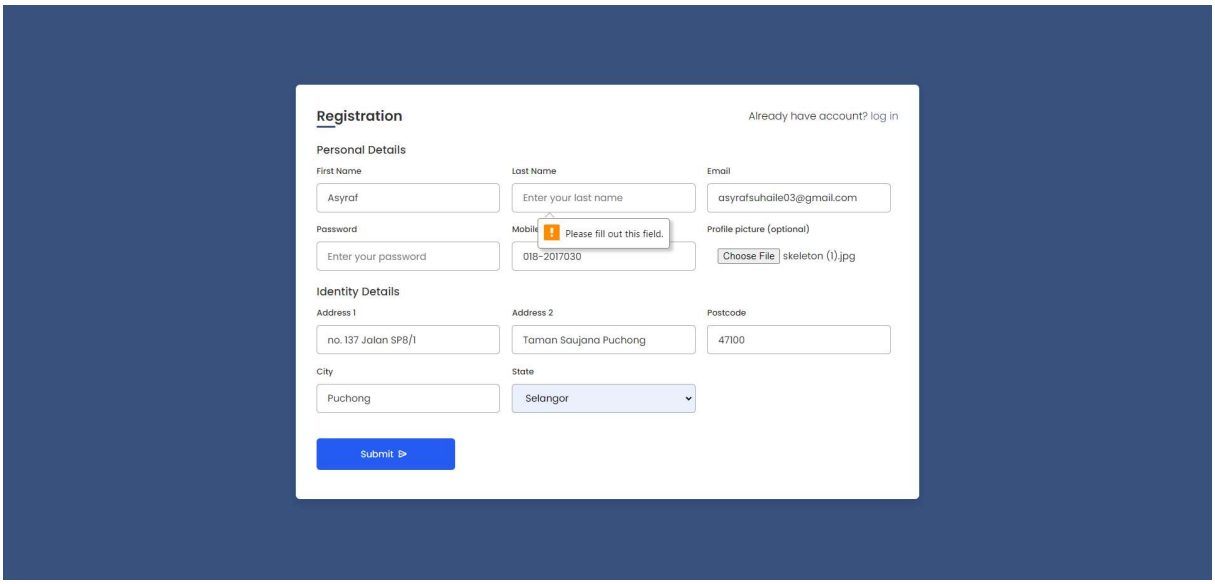


- If the user enters a wrong password, a pop-up message will appear indicating the user that a wrong password has been entered.

## 3.0 Register Page

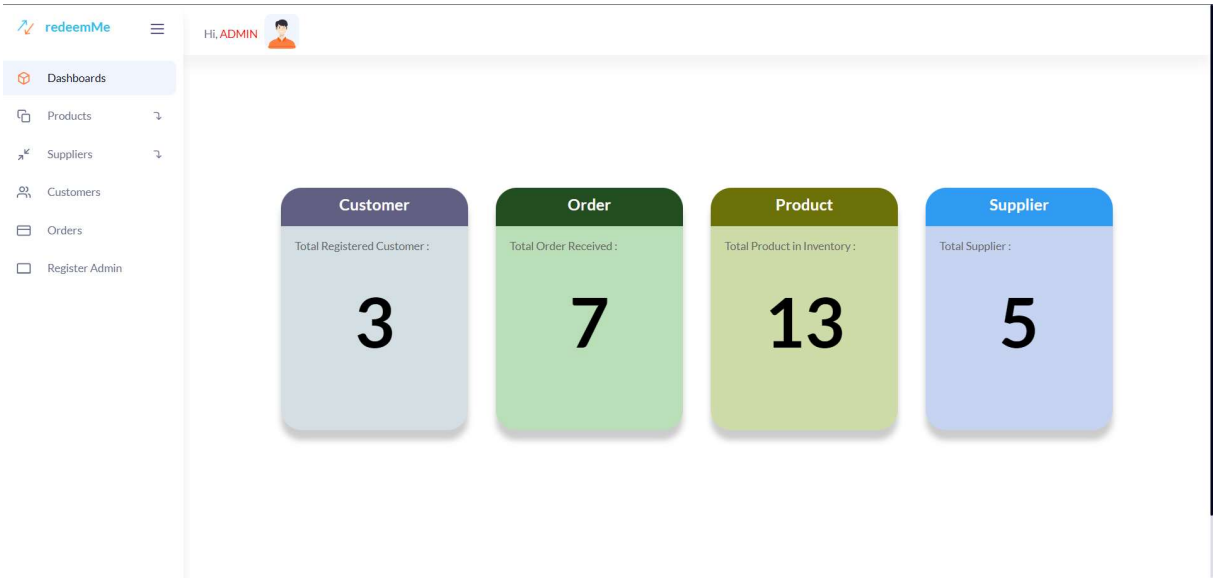


- In the registration form, users must enter their personal details: first name, last name, email, password, and mobile number, as well as identity details: address, postcode, city, and state. Then, users click the 'Submit' button located at the bottom left of the form.



- If the user fails to fill in the required information an error message “Please fill out this field” will appear indicating the user to fill up the missing field.

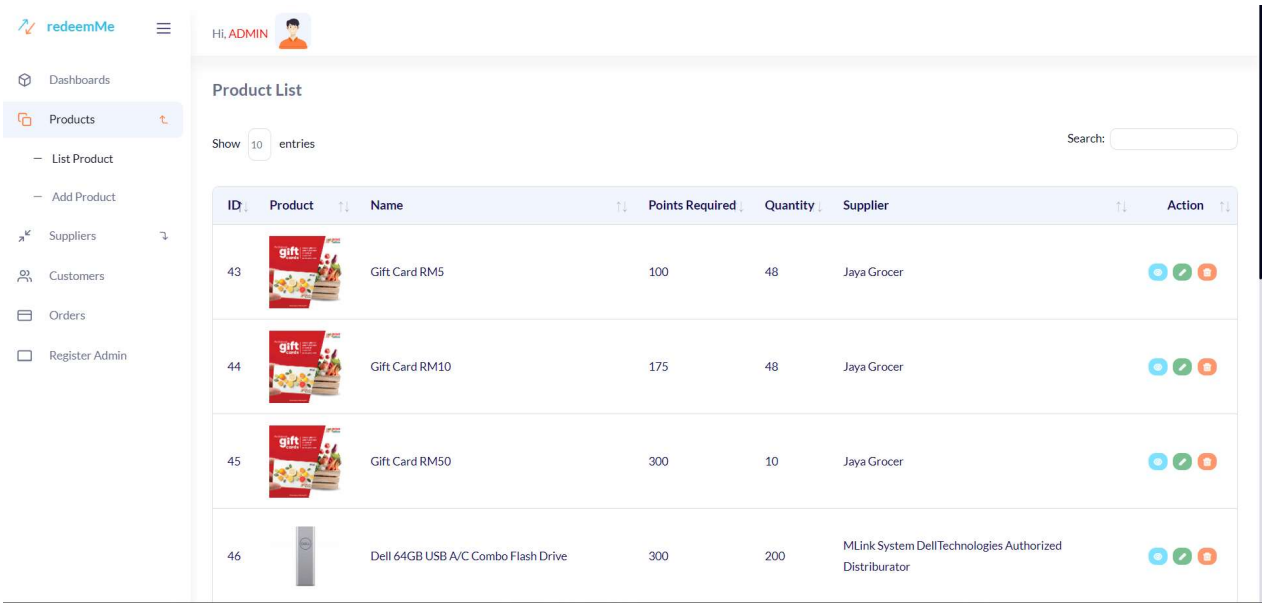
## 4.0 Admin Dashboard



- The Admin Dashboard is the central hub for administrators to monitor and manage various aspects of the system. It provides a comprehensive and intuitive interface that displays key metrics and performance indicators related to customers, orders, products, and suppliers. This dashboard ensures that administrators have quick access to vital information, enabling them to make informed decisions and efficiently manage operations.

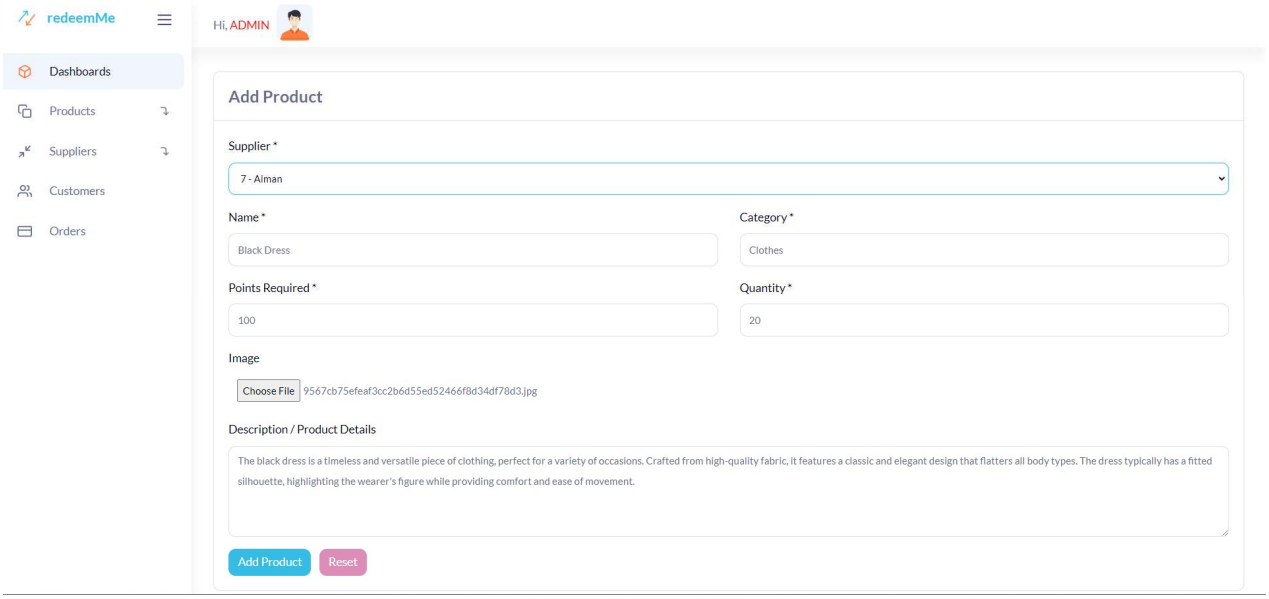
# 5.0 Products

## 5.1 Product List



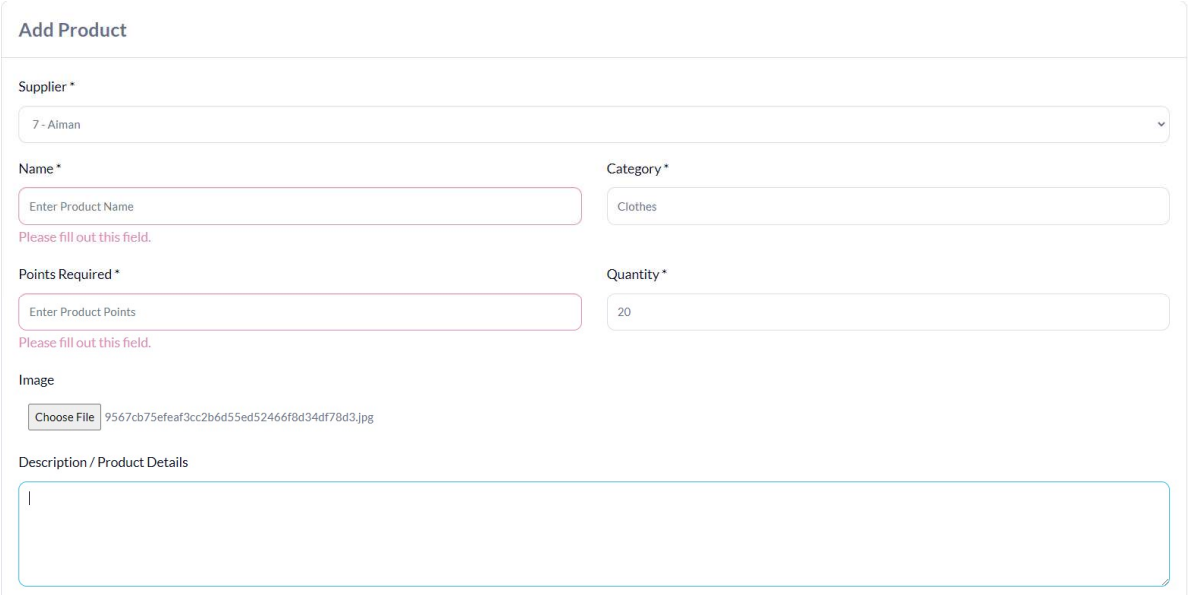
- The product list is accessible from the navigation bar on the left side of the page. When the user clicks on 'Products,' a dropdown list will appear, showing the available products. On this page, users can view, add, update, and delete products.

## 5.2 Add Product



- If the user clicks on 'Add Product' in the navigation, they will be redirected to the add products page. On this page, users can add a product to the database, which will then be displayed on the product list.

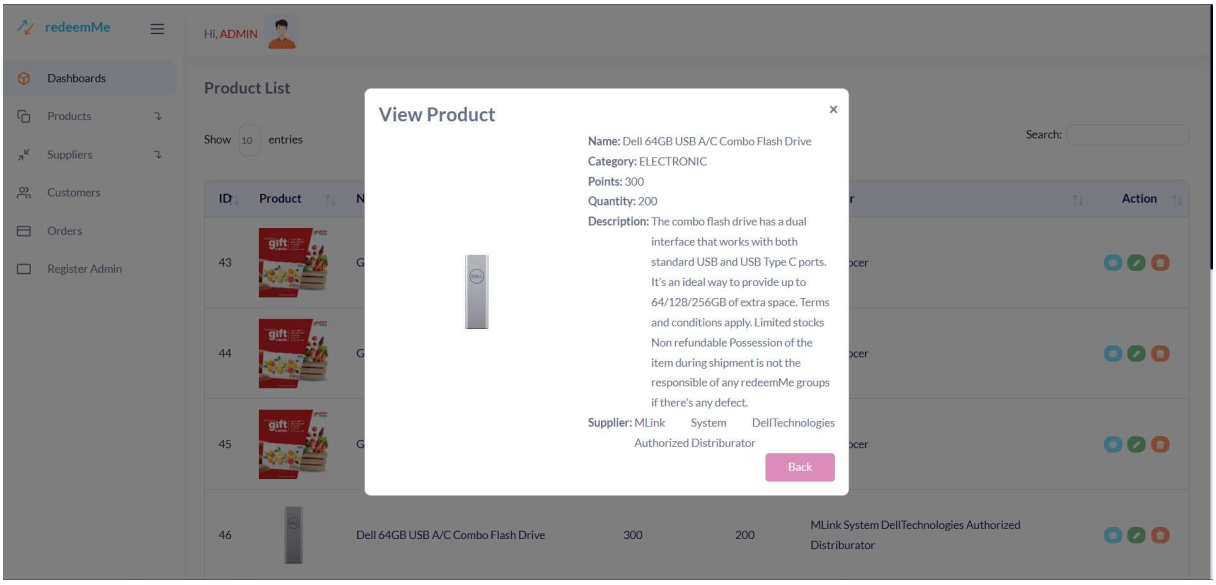
- Users are required to enter the product name, select the supplier, specify the points required for customers to claim the product, choose the product category, and provide the available quantity. Including an image and description for the product is optional; these fields are not mandatory.



- If the user does not fill out a required field, the system will display the message 'Please fill out this field.' This indicates that the user has not fulfilled the requirement. All required fields are marked with '*' symbol at the top right of the field description. If the field does not have '*' , it means the field can be left blank, and the user can choose to fill it or update it later.

- At the bottom of the page, users are presented with two options: 'Add Product' and 'Reset'. Each button serves a specific purpose; the 'Add Product' option saves the information filled by the user into the database, displaying it in the product list table. The 'Reset' button clears the form, allowing the user to refill all required product information.

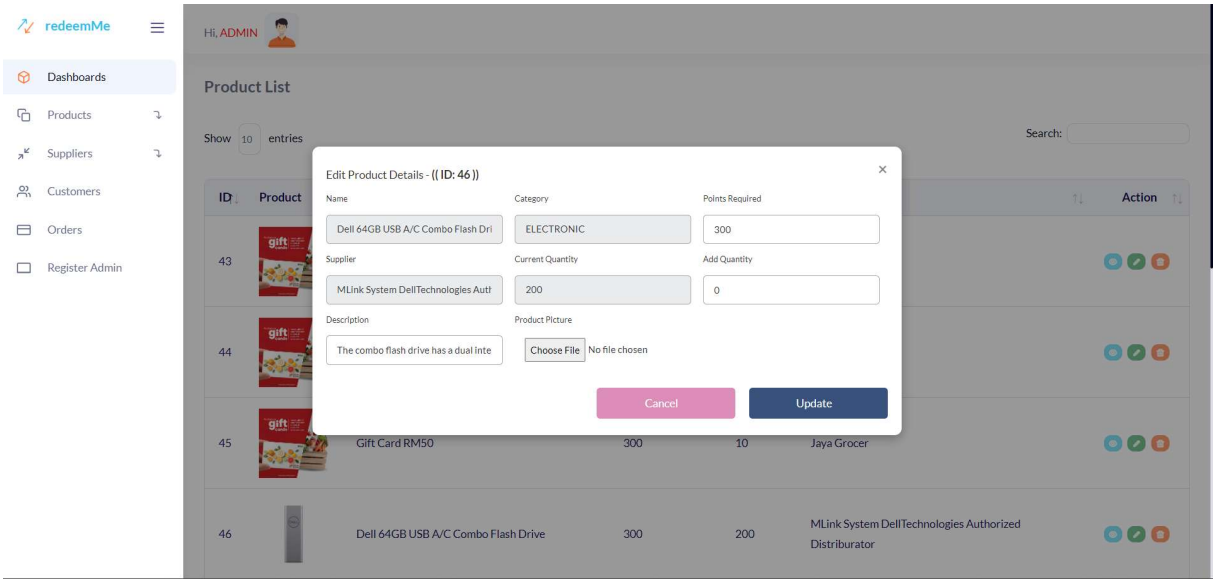
### 5.3 View Product



- When the user clicks on the eye symbol in the action column, they can view details of each product in a small box. The details include the Product ID, name, category (specifying the product type), total points required for redemption, available quantity, and the Supplier ID that provides the product.

- The 'Back' button redirects the user to the product list page.

## 5.4 Update Product

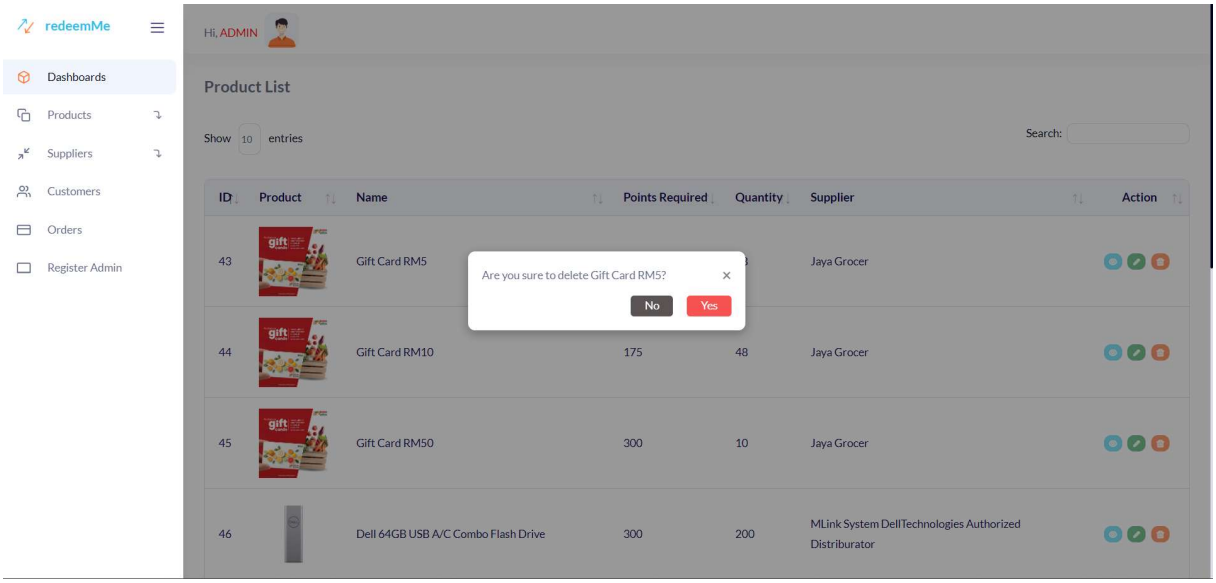


- If the user clicks on the pencil button in the action column in the Product List page, the user will be redirected to a pop-up on the same page to edit the product details.

- User can edit the name of the product, the supplier that will provide the product, the points required for customers to claim the product, the category of the product, available quantity and also the picture of the product.

- At the bottom right of the pop-up, two buttons will appear giving options for the user to cancel or update the product. The cancellation button will make the user return to the Product List page and no changes will be made. Meanwhile, the "Update" button will store the edited information into the database and the new information will be displayed in its existing row at the Product LIst page.

## 5.5 Delete Product



- When the user clicks on the trash bin button in the Action column on the Product List page, a pop-up message will appear asking 'Are you sure you want to delete (product name)?' This allows the user to confirm whether they want to delete the product permanently.

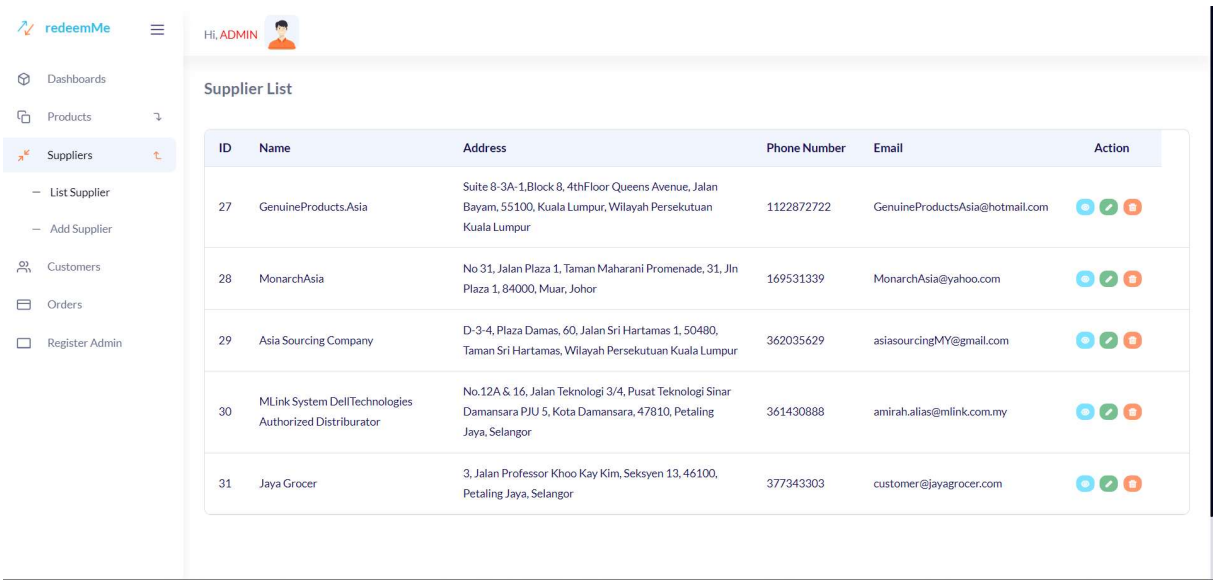
- If the user decides to cancel deleting the product, they can click on the 'No' button at the bottom right corner of the pop-up. If the user confirms their decision to delete the product permanently from both the Product List table and the database, they should click on the 'Yes' button.

- Clicking 'Yes' will result in the product being permanently removed from the Product List table and the database.

## 6.0 Supplier

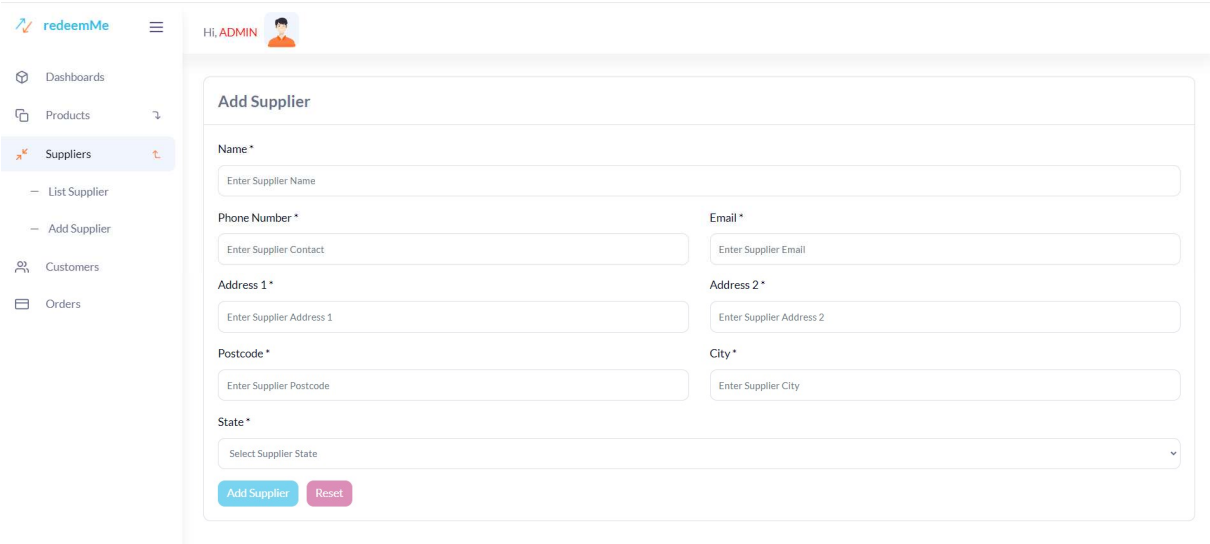
- When the user clicks on 'Suppliers' in the dropdown menu, a list will appear with options to either 'List Suppliers' or 'Add Supplier'. Choosing 'List Suppliers' will navigate the user to the supplier list table page, where they can view the list of suppliers. Opting for 'Add Supplier' will redirect the user to the add supplier form, allowing them to add a new supplier.

### 6.1 List Supplier

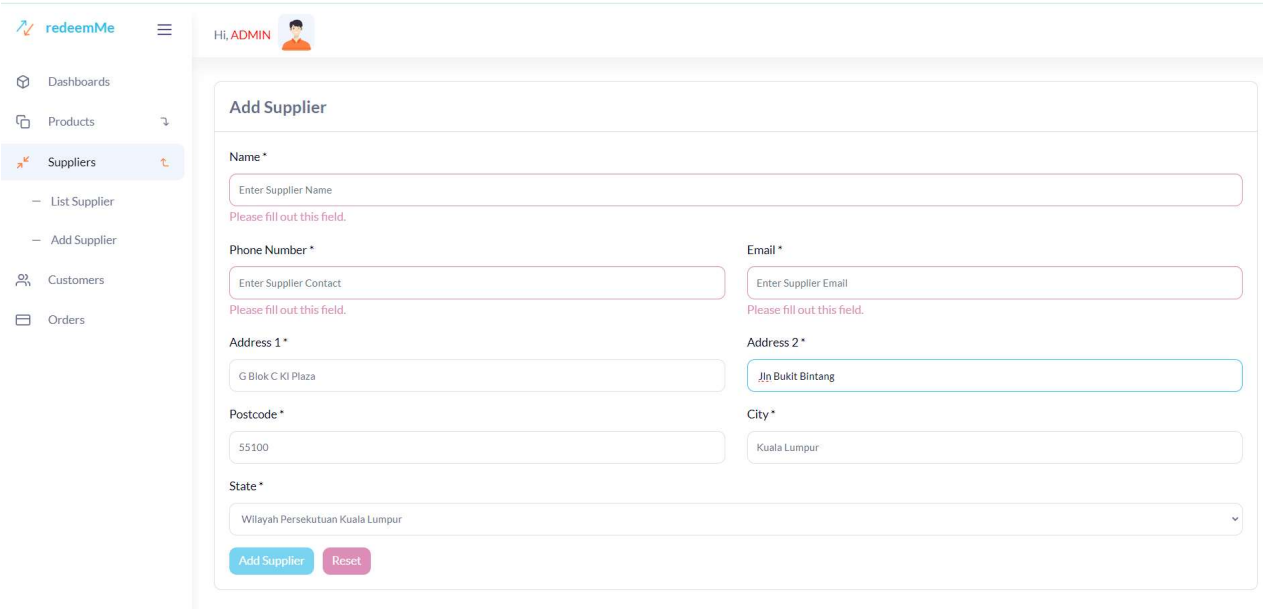


- In this page, users can view, update, and delete supplier details. In the action column, there are three buttons, each with its own functionality:
  - The eye button allows users to view supplier details.
  - The pencil button is used to update supplier information.
  - The trash bin button deletes suppliers from the table and also from the database.

## 6.2 Add Supplier

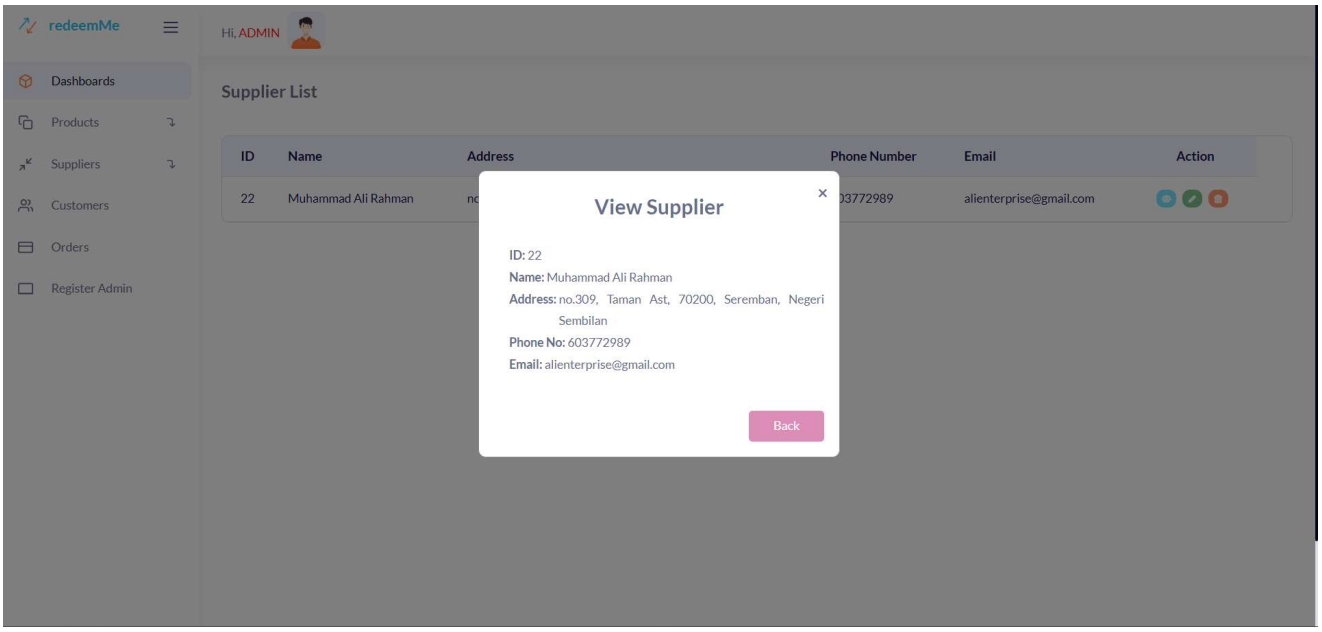


- When the user clicks on 'Add Supplier' in the navigation bar on the left side of the screen, they will be redirected to the 'Add Supplier' page. On this page, users are required to fill out a form to add a new supplier. The required fields on this page are marked with a '*' symbol at the top right corner of each form field. These include the supplier's name, contact information such as phone number and email address, as well as the supplier's address details including postcode, city, and state. After filling out the form, users must click the 'Add Supplier' button at the bottom to submit the information to the system and save it into the database.



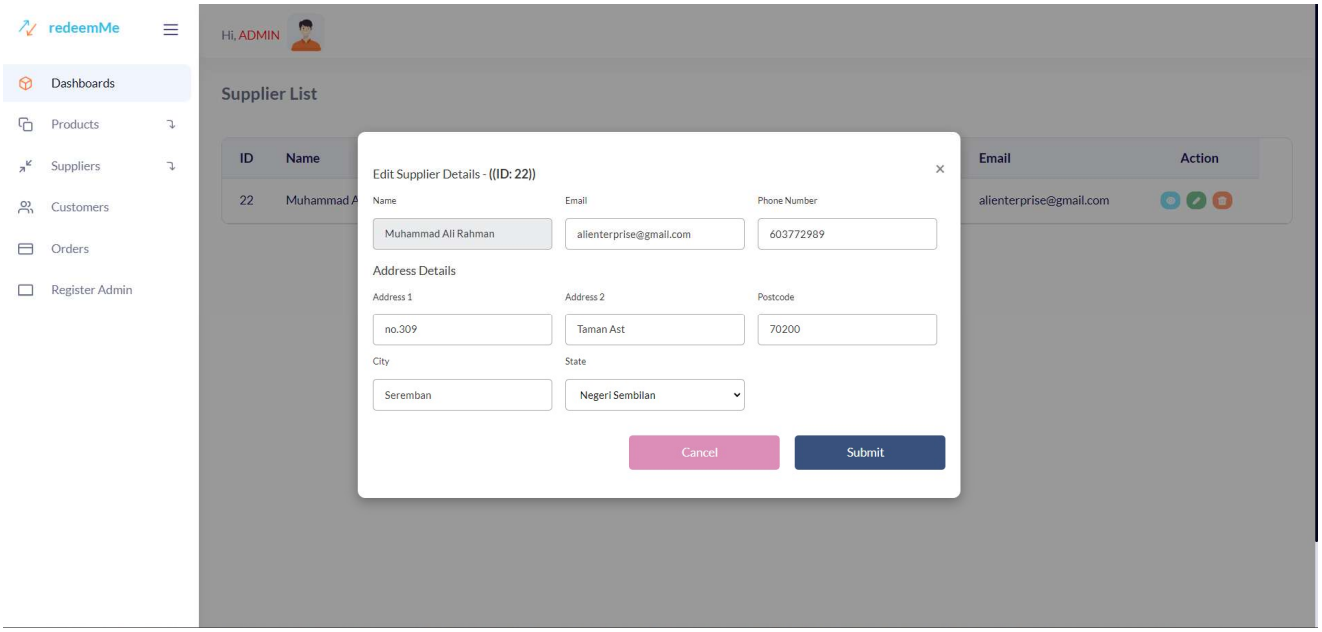
- If the user fails to fill in the required information, an error message saying 'Please fill out this field' will appear in red, indicating that the user needs to complete the missing field.

### 6.3 View Supplier Details



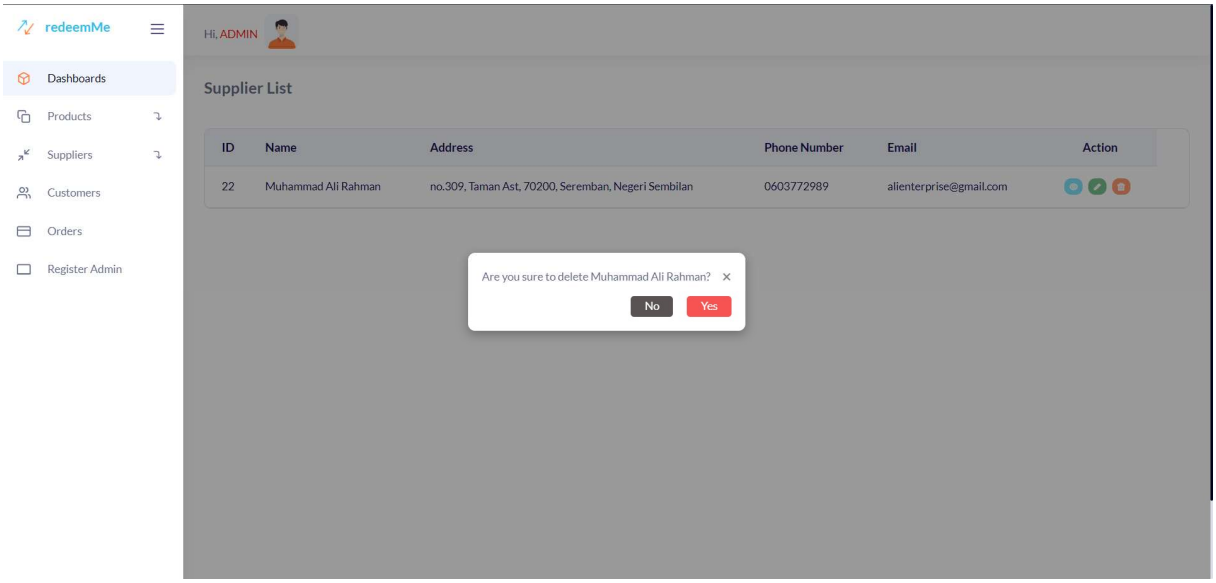
- When the user clicks on the eye button in the Supplier List page, a pop-up will appear. Inside the pop-up box, the user will be able to view all the supplier details, including the supplier's ID, name, address, and contact information such as email and phone number. At the bottom right corner of the pop-up box, the user will find a 'Back' button, which redirects them to the Supplier List page.

## 6.4 Update Supplier Details.



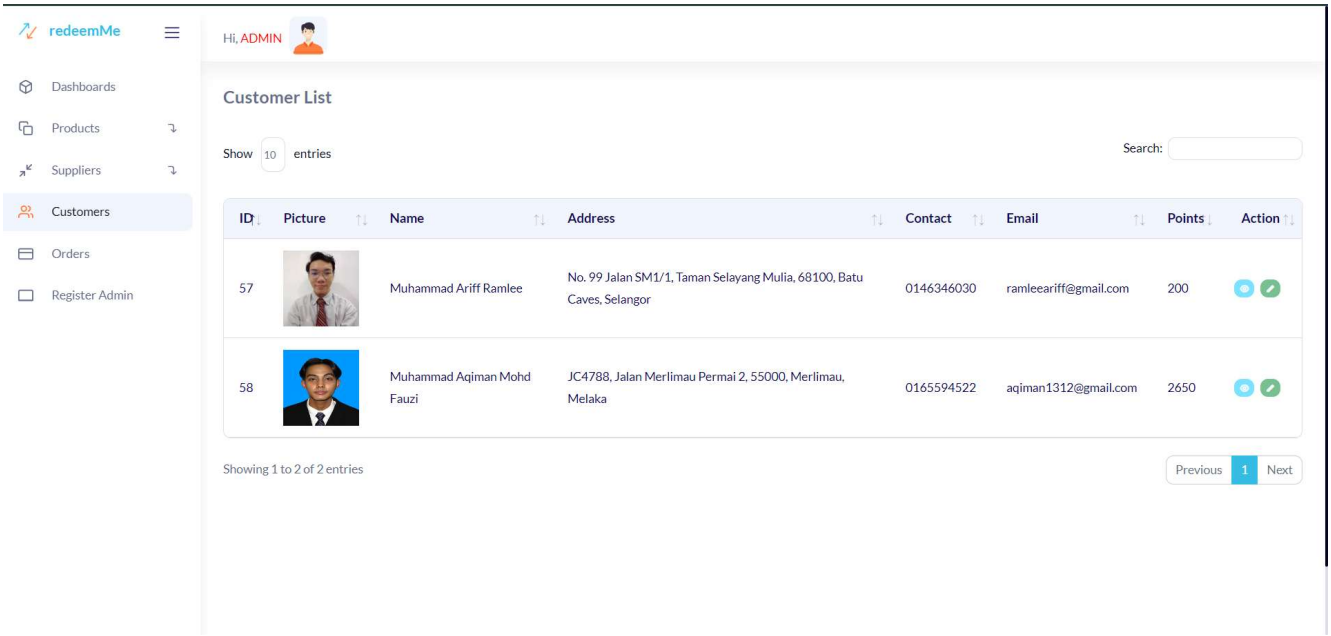
- When the user clicks on the pencil button in the 'Action' column, a 'Edit Supplier Details' pop-up box will appear. In this box, the user can edit supplier details such as supplier name, addresses, and contact information including email and phone number. At the bottom of the pop-up box, the user will find two options: 'Cancel' and 'Save'. Clicking on the 'Cancel' button will redirect the user to the Supplier List page. Clicking on the 'Save' button will send all the updated information to the system, updating and saving it in the database.

## 6.5 Delete Supplier



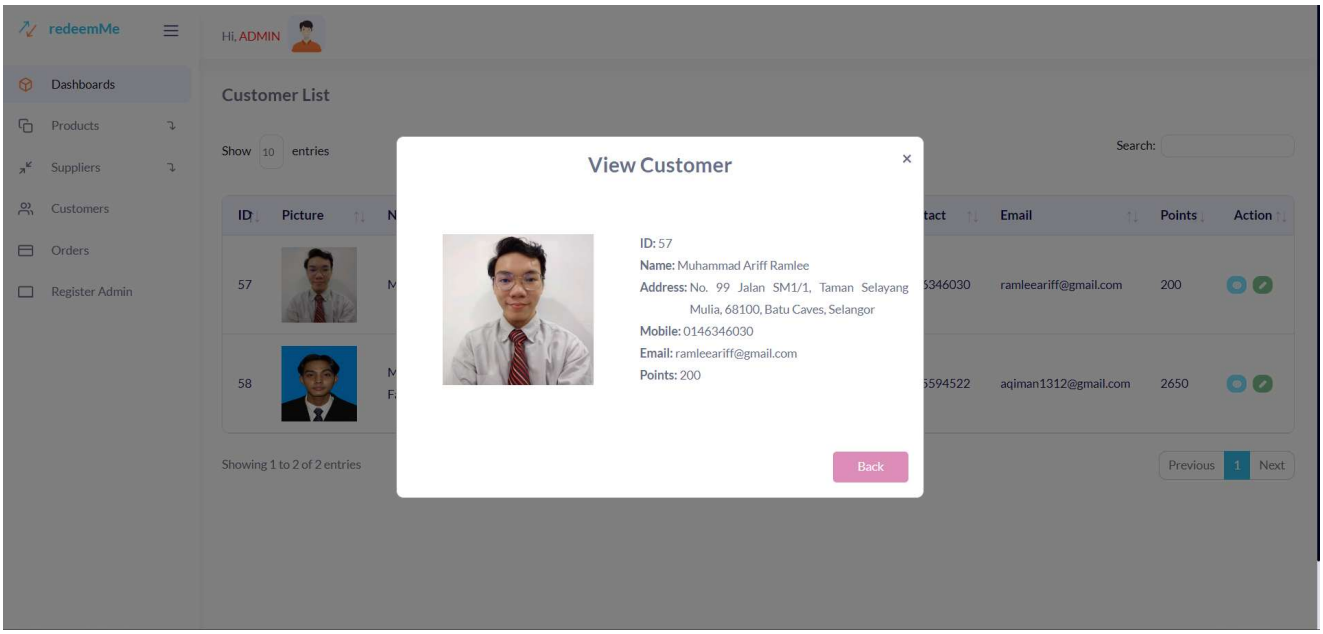
- When the user clicks on the trash bin icon in the 'Action' column, a pop-up appears asking for confirmation to delete the supplier from the table. Clicking 'Yes' on the pop-up box permanently deletes all supplier details from the table and the database.

## 7.0 Customer List



- On the 'Customer List' page, users can view a table that displays details of all registered customers. The table includes customer ID, name, address, contact information such as phone number and email address, and available points for reference.

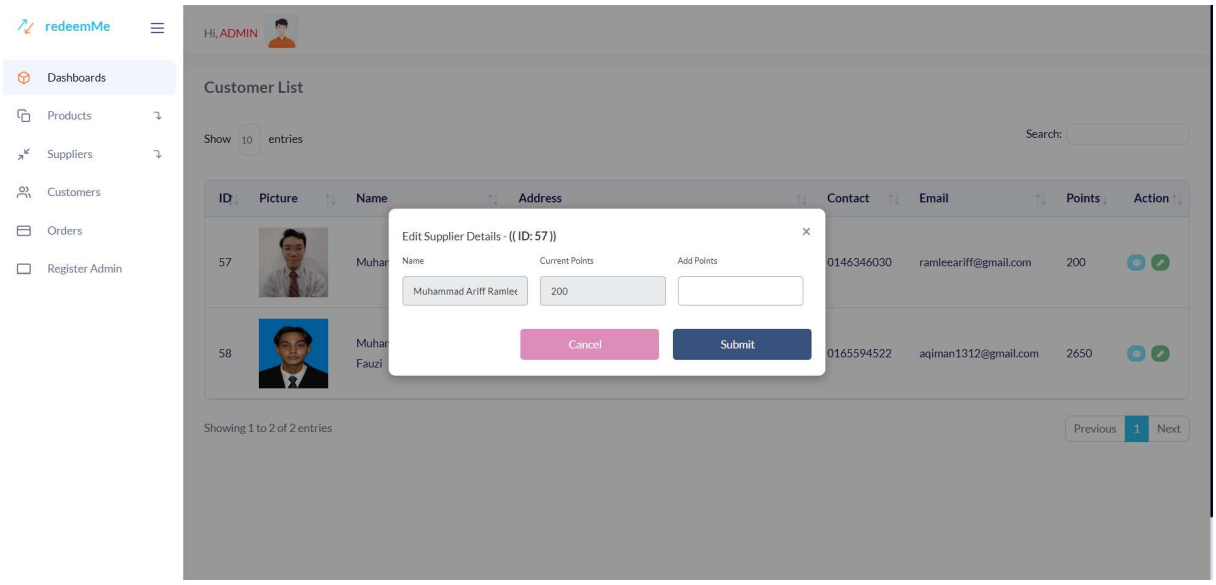
### 7.1 View Customer Details



- When the user clicks on the eye button in the action column of the customer list table, they can view all registered customer details, including customer ID,

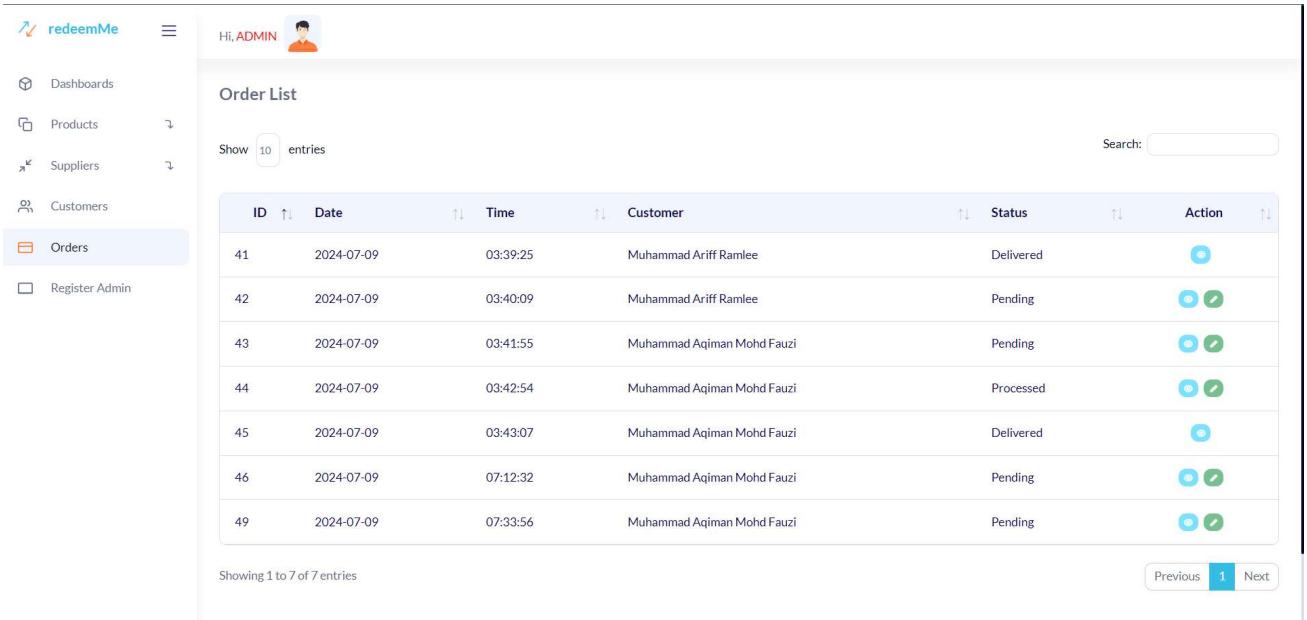
name, address, contact information such as phone number and email address, and available points. At the bottom right corner of the pop-up box, there is a 'Back' button that redirects the user to the Customer List page.

### 7.2 Update Customer Points



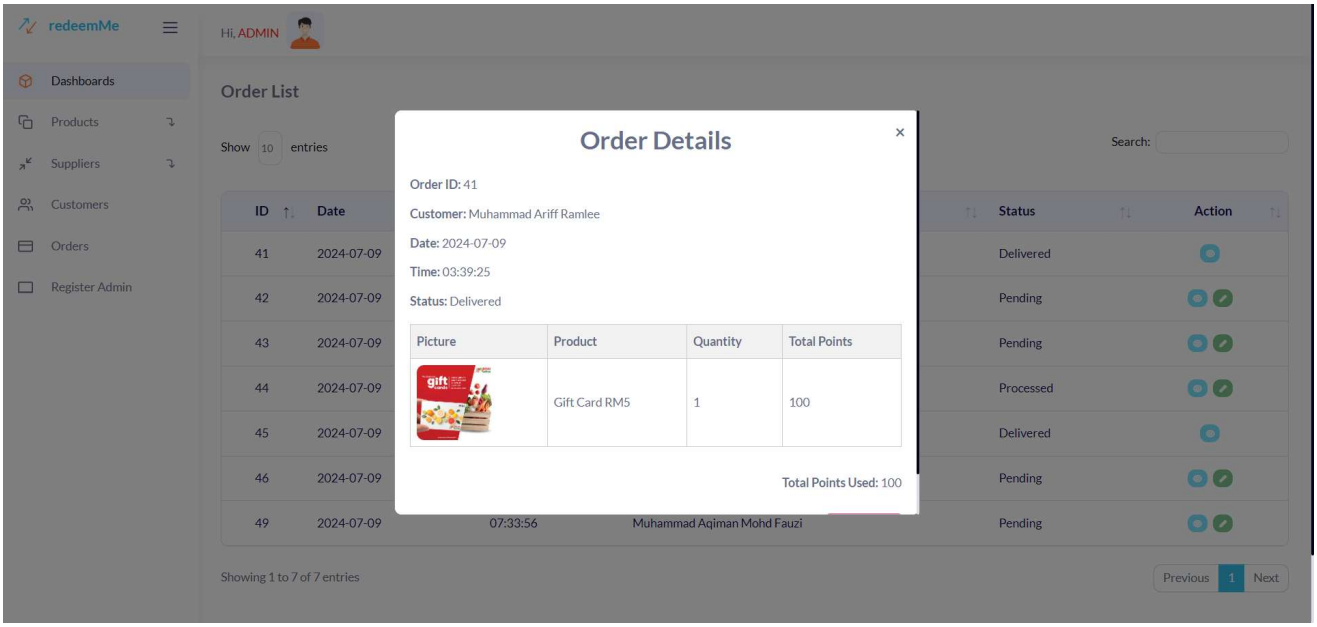
- If the user clicks on the pencil button next to the eye button in the Action column of the customer list table, a pop-up box will appear. Inside the pop-up box, the user can update the customer's points. On this page, users can only view customer details and update points, as customer details can only be updated by the customer themselves, while only admins can update customer points.

## 8.0 Order List



- On the 'Order List' page, users can view a table displaying details of all customer orders. The table includes customer ID, date, time, customer name, and status.

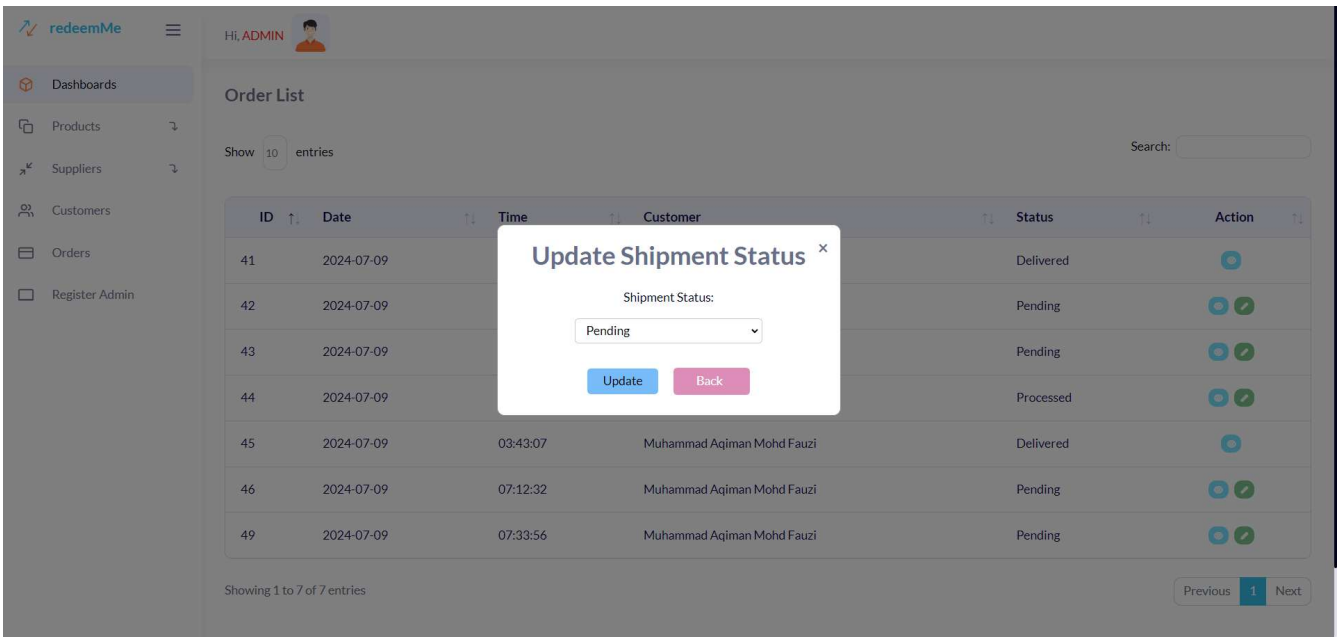
### 8.1 View Order Details



- When the user clicks on the eye button in the action column of the order list table, they can view all details of the customer's order. At the bottom right corner

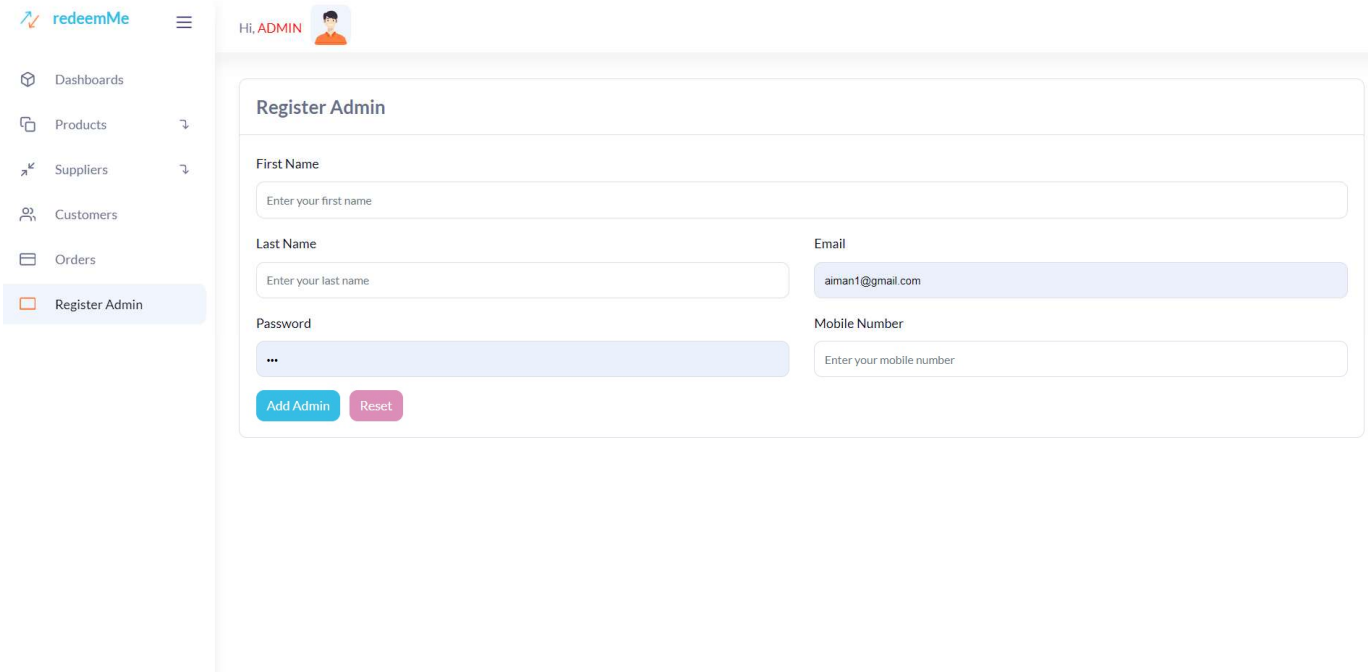
of the pop-up box, there is a 'Back' button that redirects the user to the Order List page.

## 8.2 Update Shipment Status

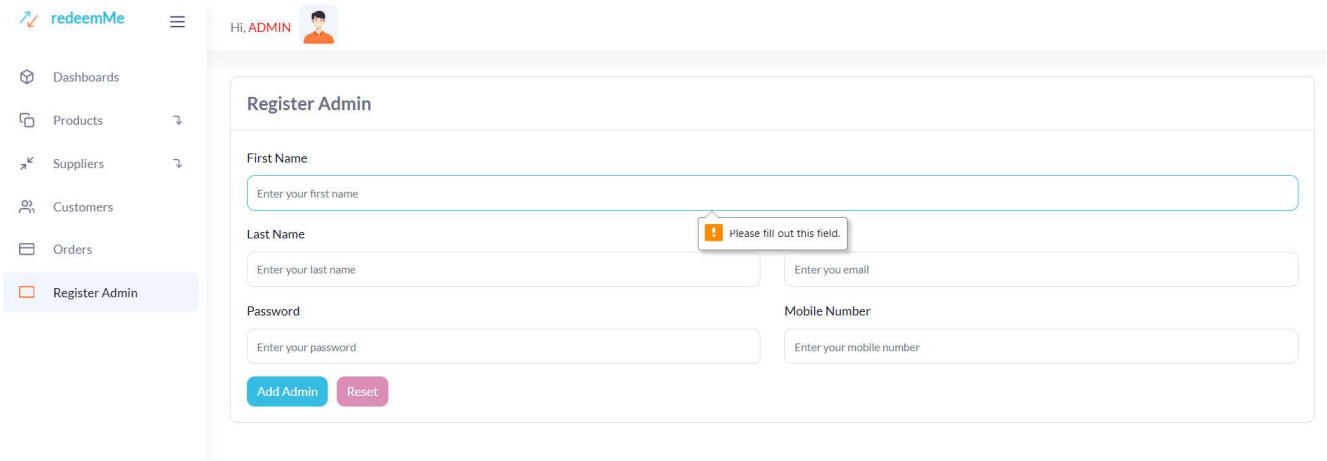


- If the user clicks on the pencil button next to the eye button in the Action column of the order list table, a pop-up box will appear. Inside the pop-up box, the user can update the order status stage by stage. At the bottom of the pop-up box, there is a 'Back' button on the right side that redirects the user to the Order List page and ‘Update’ button at the left side to submit the changes.

## 9.0 Register Admin

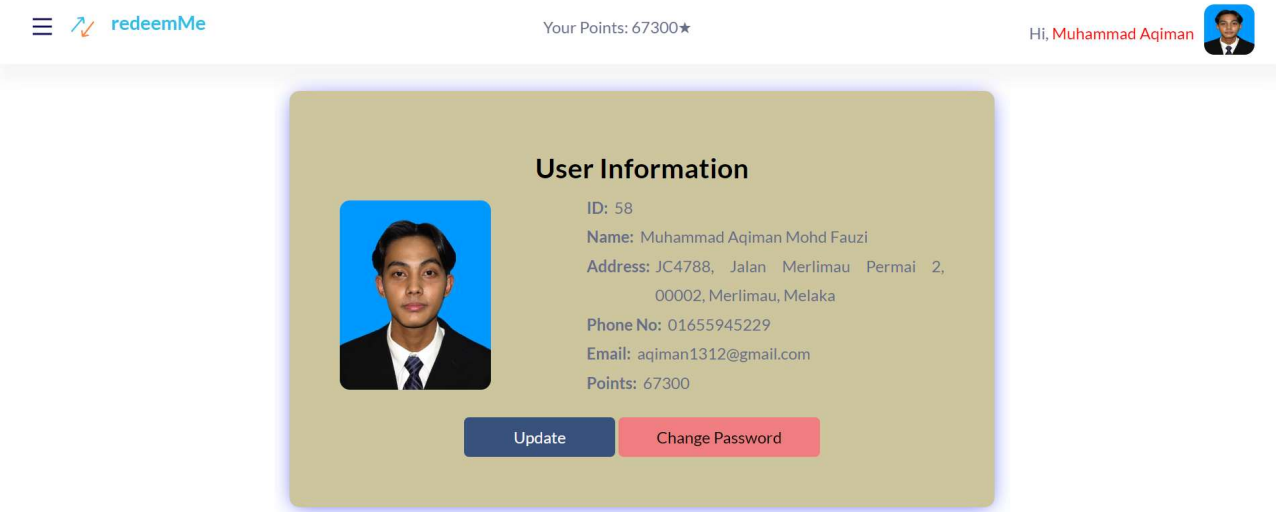


- In the registration form, users must enter new admin personal details: first name, last name, email, password, and mobile number. After entering the details, users can click the 'Add Admin' button located at the bottom left of the form to submit. If users want to reset the inserted data, they can click the 'Reset' button.



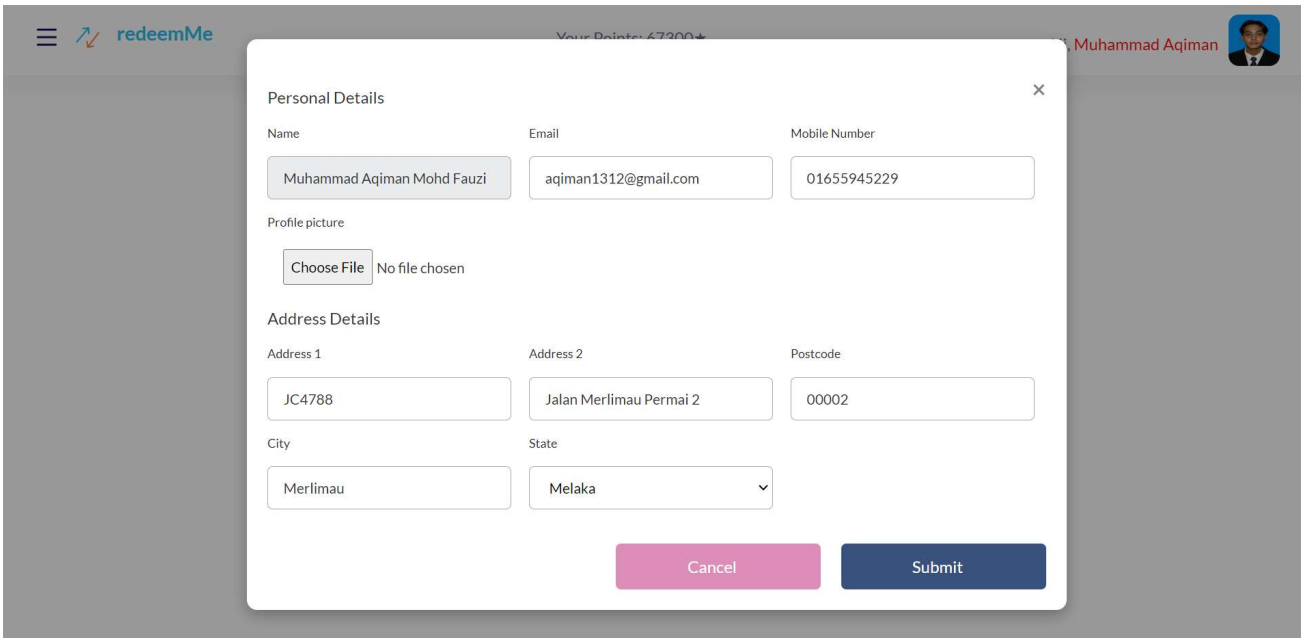
- If the user fails to fill in the required information an error message “Please fill out this field” will appear in the red color indicating the user to fill up the missing field.

## 10.0 Customer Profile



- On the 'Customer Profile' page, user can view their customer details table. In the customer table, user will be able to see their profile picture if added, customer ID, customer name, customer address, customer contact information such as customers' phone number and email address and also the available points for the customer references.

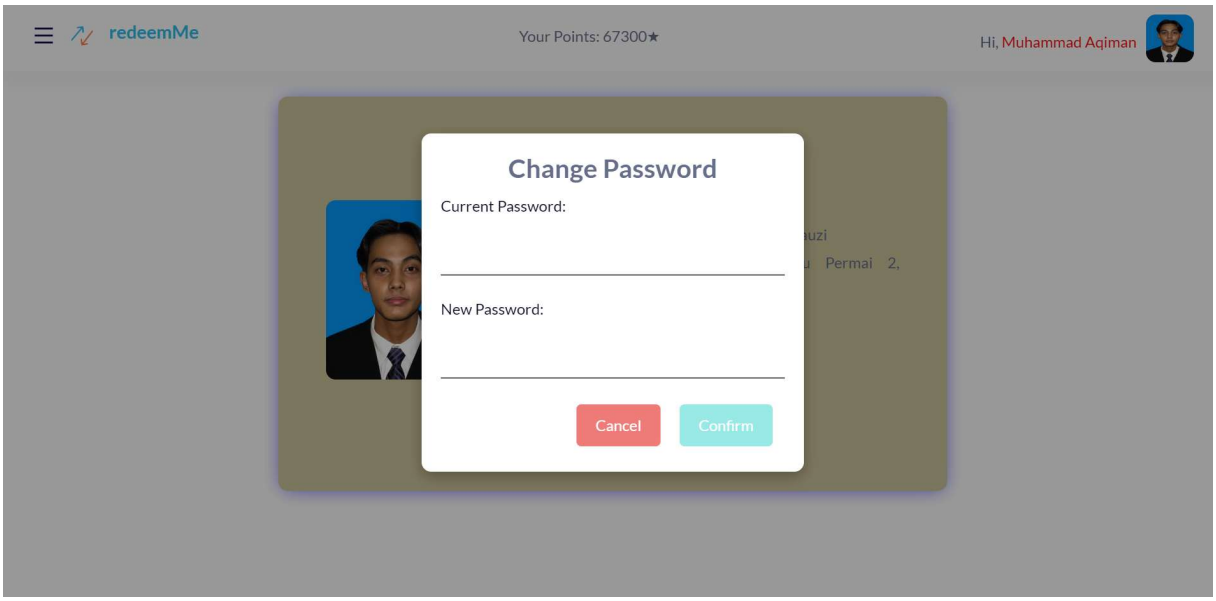
### 10.1 Customer Update Profile



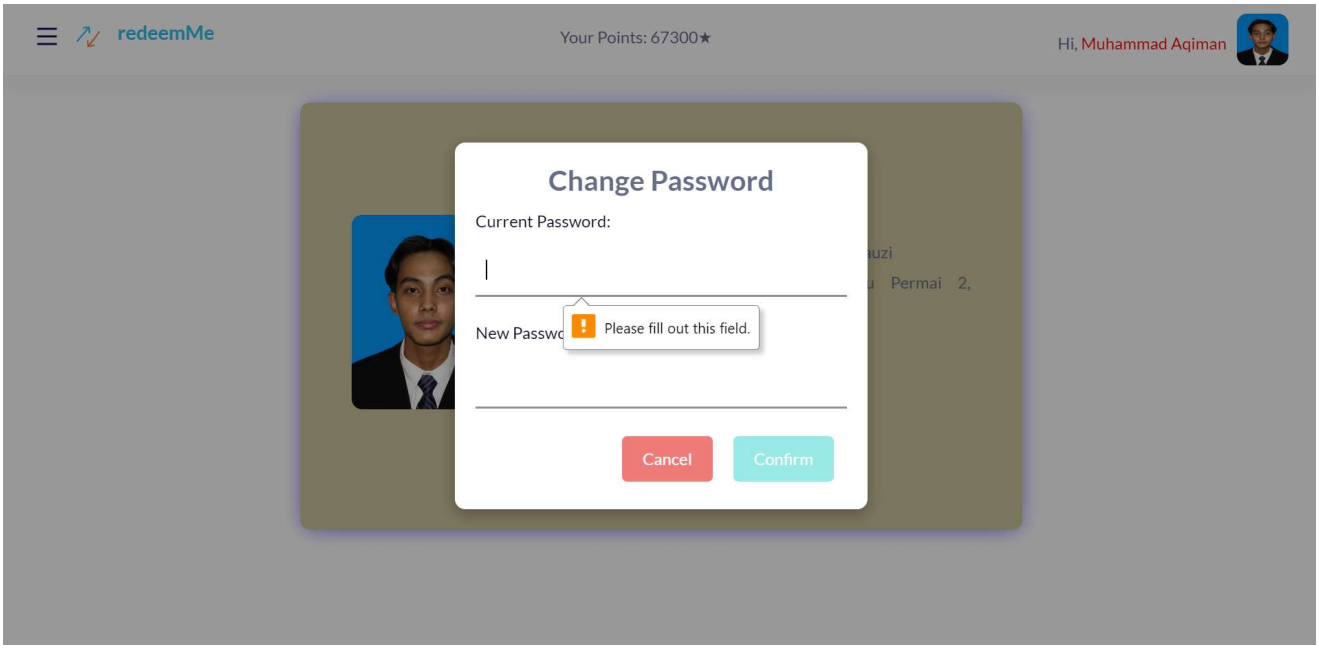
- When the user clicks on the 'Update' button inside the customer profile table, a pop-up box will appear. Inside this pop-up box, the user can update the customer's email, mobile number, profile picture, and address details. The existing customer information will be displayed to allow the user to see and edit the previous data. The user can cancel the update by clicking on the 'Cancel' button or submit the updated profile information by clicking on the 'Submit' button.

- If the user fails to fill in the required information an error message “Please fill out this field” will appear in the red color indicating the user to fill up the missing field.

**10.2 Customer Change Password**

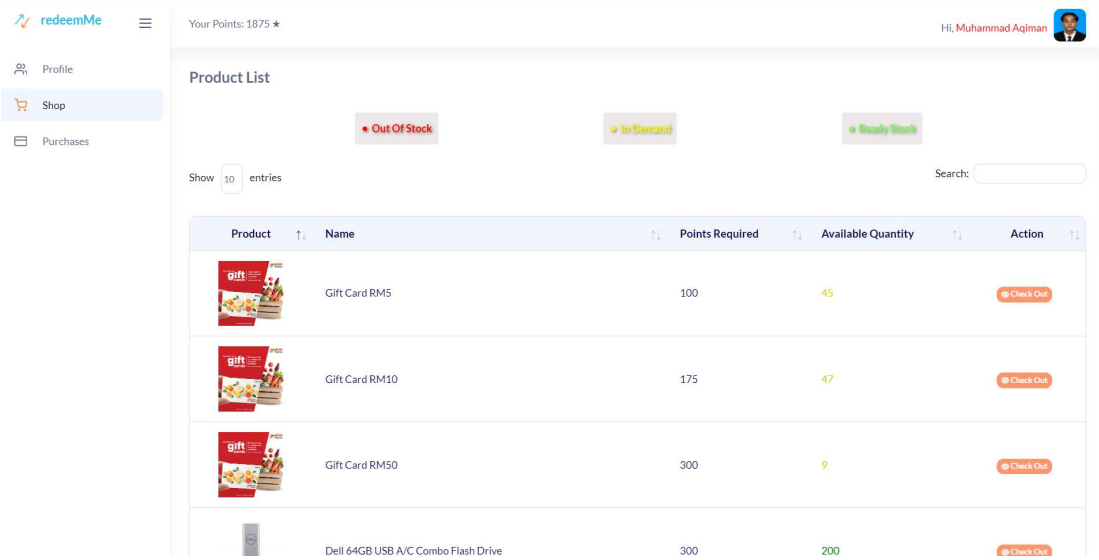


- When the user clicks on the ‘Change Password’ button inside the customer profile table, a pop-up box will appear. Inside this pop-up box, the user can update the customer's password for their email. The user must enter their current password in the first column and the new password in the second column. The user can cancel the password update by clicking on the 'Cancel' button or submit the updated password information by clicking on the ‘Confirm’ button.



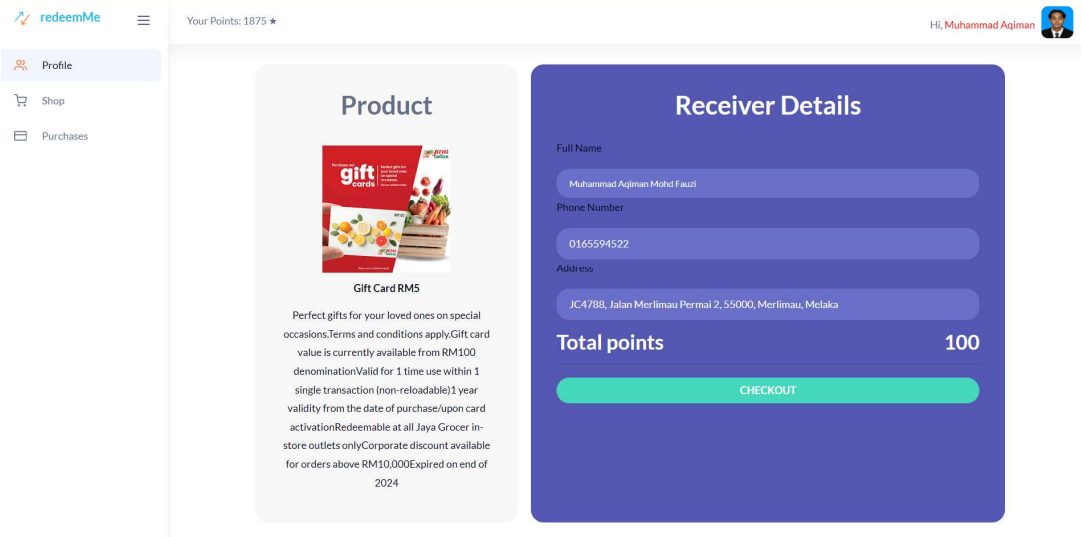
- If the user fails to fill in the required information an error message “Please fill out this field” will appear in the red color indicating the user to fill up the missing field.

## 11.0 Customer Shop

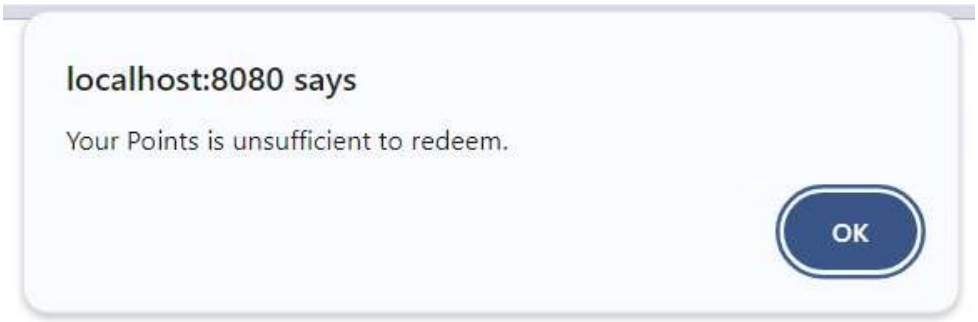


- The product list is available in the navigation bar on the left side of the page. When the user clicks on 'Shop,' a dropdown list will appear, showing the available products. On this page, users can view and check out the products they want to redeem. Users can see the product picture, product name, the points required for redemption, and an action button. Users can search for products by entering a keyword in the search column at the top right corner above the product list. There are also indication notes: 'Out of Stock' in red, 'In Demand' in yellow, and 'Ready Stock' in green. The product quantity will appear in different colors based on these indications. These notes guide users to identify the highest redeemable products in the list.

### 11.1 Customer Checkout

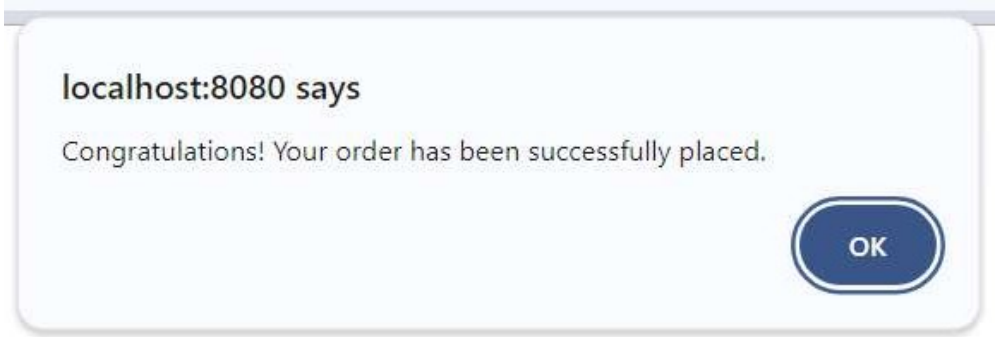


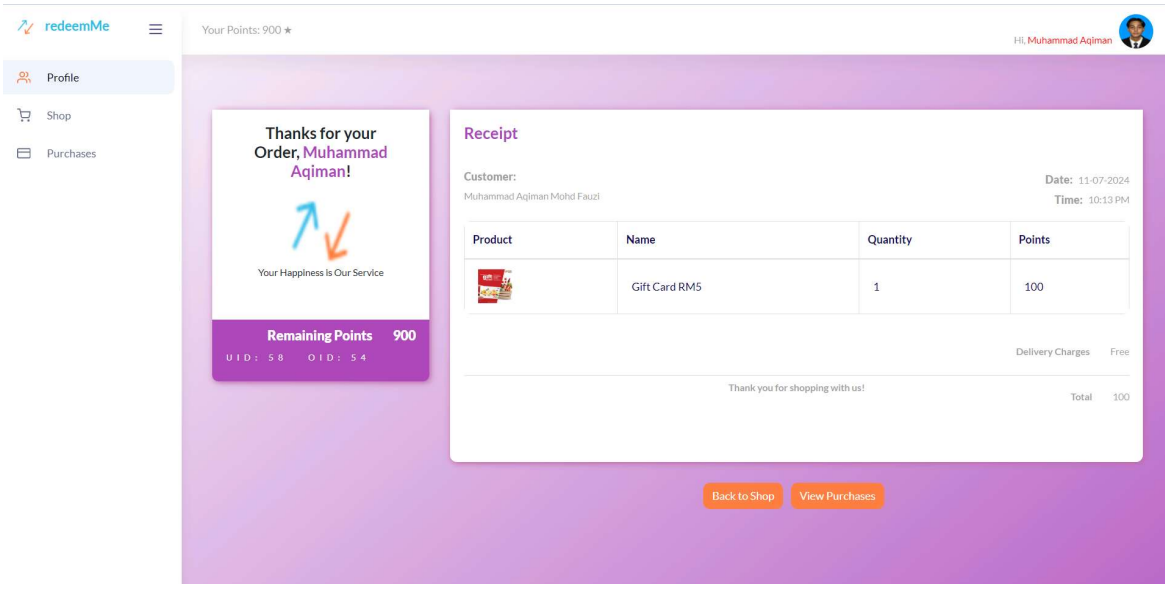
- When the user clicks on the 'Check Out' button on the Product List page, they will be directed to the checkout page for the validation process. On the checkout page, the user will be able to view product details, including the product image, product name, and product description, as well as the receiver details, including the customer's full name, phone number, address, and the total points required for redeeming the product. Users can check out only one product per transaction. At the bottom right corner of the receiver details box, the user will see the 'CHECKOUT' button to validate the redemption. If the user wants to cancel the checkout, they can click on the 'Shop' button in the navigation bar on the left side of the page.



- If the user's points are insufficient to redeem the product, a pop-up message saying 'Your points are insufficient to redeem.' will appear and redirect the user back to the Shop page.

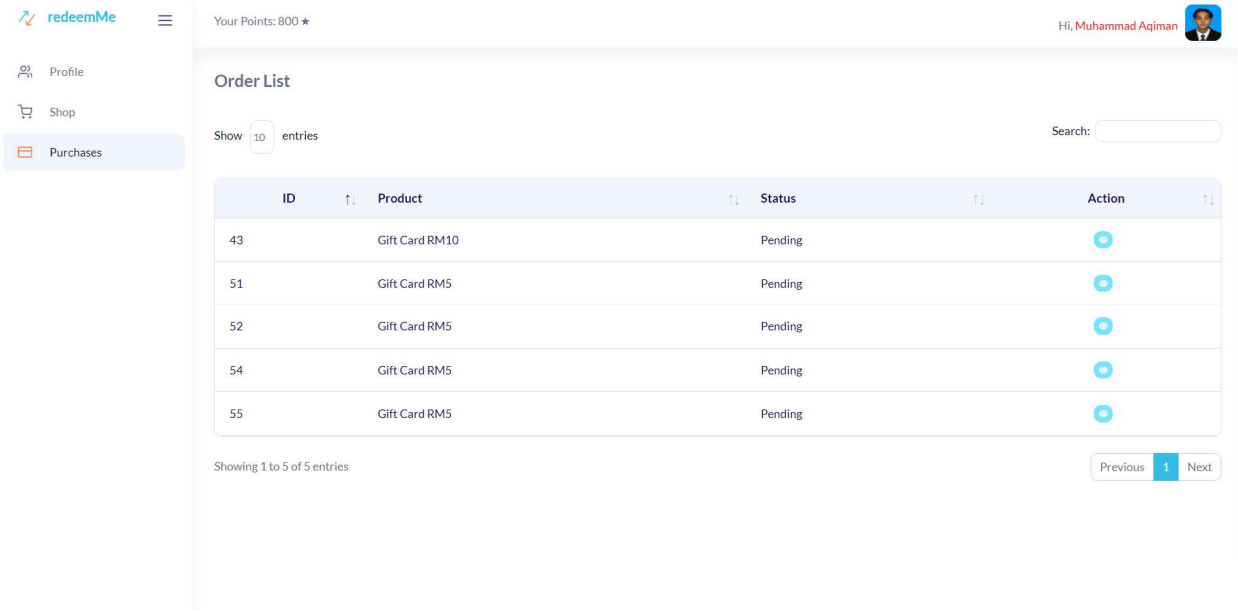
**11.2 Customer Receipt**

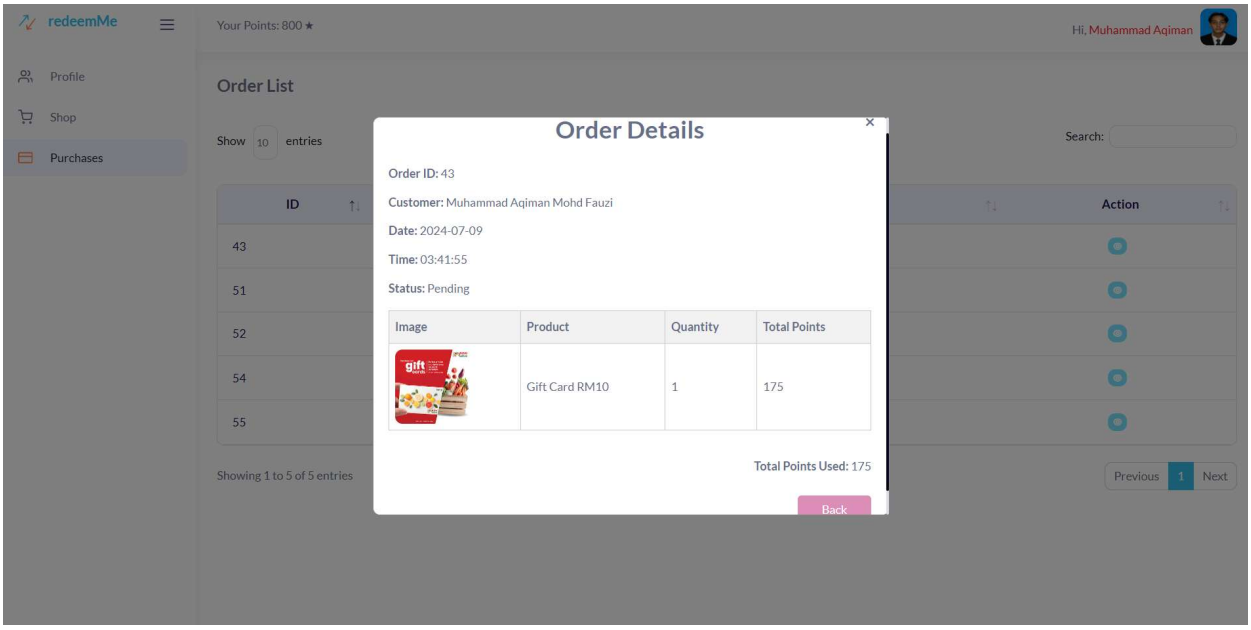




- When the user clicks on the 'Check Out' button on the checkout page, a pop-up message saying 'Congratulations! Your order has been successfully placed.' will appear, indicating that the user has successfully redeemed the product. They will then be directed to the receipt page. On the receipt page, the user will be able to view the checkout receipt, which contains the customer's name, order ID, order date, product details, and their balance points. Below the receipt box, there is a 'Back to Shop' button that redirects the user to the Shop page and a 'View Purchases' button that directs the user to the Purchases page.

## 12.0 Customer Purchases





- The Order List is available in the navigation bar on the left side of the page. When the user clicks on 'Purchases,' a dropdown list will appear, showing the order details the user has made. On this page, users can view their order details, including the order ID, product name, and order status. If the user wants to view more order information, they can click on the eye button in the action column. A pop-up will appear, displaying the order ID, customer name, order date, order time, order status, and product details with the total points used. At the bottom right corner of the pop-up box, the user will see a 'Back' button. The 'Back' button will redirect the user to the Order List page.
